KDS D20 AND KDS D40

# KONE Design signalization

# KONE Design signalization for passenger elevators

KONE Design signalization adds the finishing touches to your elevator by allowing you to match the car operating panel (COP) and landing signalization with the overall car design. The wide variety of color options and patterns available make it easy to create an elevator that reflects the look and feel of your building.

Choose from our award-winning standard range, add a splash of color with the new Blocks signalization, or make the elevator experience even more fun for children with the Zoo design. For environments where visibility and accessibility are important, we now offer the high-contrast, accessible Numbers signalization.

## KONE Design signalization includes:

- COPs with sleek metallic frames
- Frameless numerical floor displays
- A wide choice of colors and patterns
- Landing devices and signalization in matching colors
- User-friendly, accessible design

The KONE Design signalization combines fresh, exciting colors and unique patterns with flexibility, usability and durability. All car operating panel designs are available in both partial- and full-height versions.

# Standard designs

## KDS D20 partial-height

Partial-height COPs are designed for low- to mid-rise buildings.

Made from glossy, durable polycarbonate, the KDS D20 features:

- A wide range of faceplate colors and designs
- Curved aluminum frames in mirror polished and matt finishes
- Matching solid-color landing signalization devices

# Standard designs

## KDS D40 full-height

The KDS D40 series is designed to accommodate the larger number of floor buttons required in medium- and high-rise buildings.

Made from glossy, durable polycarbonate, the KDS D40 features:

- A wide range of faceplate colors and designs
- Floor-to-ceiling aluminum frames in mirror polished and matt finishes
- Matching solid-color landing signalization devices

The playful design of the Zoo signalization makes using the elevator more fun for children, while also helping them to find their destination. This design is ideal for children's hospitals, day care centers and schools as well as residential buildings.

# Unique designs

## Functionality, accessibility, and fun

Our innovative new range of signalization designs provide passengers with an accessible, user-friendly elevator experience. All three new designs include easy-to-use COPs with eye-catching graphics and matching landing signalization.

These new designs help you add a splash of color and fun to your elevator design while making it even easier and more convenient for passengers to reach their destination.

- Bold and bright colors
- Colorful, fun animal designs that make it easy for children to remember their floor
- Large, high-contrast numbers combined with braille for improved accessibility
- Available in full- and partial-height, with maximum seven floor buttons

## BLOCKS

A user-friendly design that combines bold colors with clear numbering and floor information to make it even easier for passengers to find their destination.

This fresh, bright signalization design is ideal for all types of buildings, including retail environments, offices, and residential buildings. Choose landing signalization to match the colors on the COP for even better usability as well as a consistent look and feel throughout your building.

## NUMBERS

High-contrast design and large, clear numbers combined with braille make it easier for passengers to find their destination in environments where accessibility is vital.

Numbers signalization is ideal for retirement homes, sheltered housing, and buildings with partially sighted or blind residents.

# Visual options

## Landing devices

---

Surface-mounted landing call stations and hall lanterns/indicators are available in eight solid colors. They can be matched to the car interior or used to color code building floors.

## COP button and pressel options

---

Signalization buttons are available with an amber or white acceptance light.

Relief marking with mirror polished stainless steel finish.

Relief marking with brushed stainless steel finish.

## Displays

---

Uncluttered, frameless numerical displays, including a scrolling dot matrix option, complete the COP's sleek look.

Further assistance of the recommended display colors for different faceplate colors from KONE representative.

## Frames

---

KONE Design signalization frames are available with a mirror polished or satin finish.

NOTE:  
Landing signalization devices can be surface mounted on the door frame or wall. The frame material is plastic with metallic mirror or satin finish.
